We are here to build something for the long-term. Anything else is a distraction.

At workspace infotech

We have always put our client first. As a result, we enable our clients to put their people first; helping them build the people-centric environments they need to grow in order to meet their business goals.

As A Result

We enable our clients to put their people first; helping them build the people-centric environments they need to grow in order to meet their business goals.

We Believe

Software should work for the people and not the other way around. Customers choose us for our sophisticated people management technologies delivered

We Execute

Every project with persistent accountability. We listen to your goals and develop strategies based on your business. We also track our performance.

1 | Our mission is to become a market leader by consistently exceeding our Customer's expectations.

2 | Providing them with best of breed technology solutions like business management system or any kind of software.

3 | We will continually communicate with, and learn from our Customers, in order to improve our products and services.

4 | We will keep on top of today's and tomorrow's technology.

Our mission

Our timeline

We are here to build something for the long-term. Anything else is a distraction.

We Started

The Company

2008

Trying to connect dots

Dreaming and starting a fresh from a tea stall. Got work from some clients on creating dating portal in Germany. Chat server worked. Licensing in Bangladesh and forming a PHP and Design team.

2010

Arranging more dots

Hired employees, setup office, delivered dating portal and photo booth software, arranged a Python and JAVA team.

2012

Dig down to the depth

Expanding business. Making team in CMS and Database Expertise.

2014

Expanding the radius

Opening a training center in Bangladesh. Conducting workshops and trainings for universities in Bangladesh. Expand business in USA, Australia and Sweden.

2016

Cope up with the new era

Expanding Django, JAVA and Mobile team. Released an app and setup office in Australia.

2020

Trying to make it remarkable

Creating a client base in Europe with focus on Germany and Sweden Germany projects in Bangladesh. Conducting training sessions all over Bangladesh on behalf of Government of Bangladesh.

It's 2024

We are Still Growing

Our working process

STEP

01

- Decide the stack.
- Analyze requirements.
- Split story with module and create milestone.
- Create Low/High fidelity prototypes along with iteration process.

STEP

02

- Create dataflow of the project and use case scenario for future testing.

STEP

03

- Choose tools to develop the project.
- Create task management systems.
- Track the project progress.

STEP

04

- Design templates for the product and review.
- Finalize the ER diagram for the product.
- Design case model and use it for testing.
- Plan for QA team.

STEP

05

- Split the whole product into small features as part of the release plan.
- QA team test the features before a release.
- Determine Beta release date.

STEP

06

- Handle change request smartly.
- Write product user guide and source code documentation.

Our services

We are here to build something for the long-term. Anything else is a distraction.
